

## High Quality, Branded Product Range

ON-EC are an independent specialist and only sources products from market-leading manufacturers.

This independence means that we are able to design the most appropriate lighting scheme for your business.

Supplying professional grade, branded products from trusted manufacturers also enables us to guarantee they have the following key benefits:

- >> 5-year warranty (on luminaires)
- >> Long life (15 years for a typical office)
- >> Full European safety approval
- >> Flexible colour temperature options
- >> Emergency lighting options
- >> SMART Switching & Sensors

## 100% Mercury Free

All fluorescent lamps contain mercury. Mercury is poisonous to health and the environment.

All of the LED Lights we supply are 100% Mercury Free, contain no harmful substance, and can be recycled.

## Tax Savings

To encourage investment in energy saving technologies, LED lighting now qualifies for 100% tax relief. This Enhanced Capital Allowance (ECA) scheme is currently available to UK businesses, and means 100% of the capital cost can be offset against taxable profits in a single year.

## Installation

ON-EC's installation team are highly experienced and fully accredited to work with organisations across almost any sector in the UK:

- National UK coverage
- Experienced and accredited teams
- Proven track record
- Flexible working (inc. nights and weekends)
- Fully insured
- 24-hour emergency contact
- Dedicated project manager

We will also comply with any rules and working practice requirements you may have, ensuring that comprehensive risk assessments & method statements are undertaken and mutually agreed on prior to any installation works commencing.

## ON-EC's Finance Option - Zero Upfront Cost

Whilst all projects can be funded directly from capital, we can also offer a range of zero upfront cost finance options.

ON-EC's finance options cover the total cost of supply and installation, enabling you to upgrade your lighting today, without paying any upfront costs.

With our finance options, your fixed monthly repayments are funded entirely through the energy savings on your electricity bill, and with typical terms of 3 years, all future savings are fully retained by you to be utilised elsewhere in your organisation.

To understand more about ON-EC's finance options, and to receive a bespoke proposal for your business, please contact our LED Upgrade Team
